4. WHERE DO WE WANT TO BE?
A VISION OF THE NEXT TWO DECADES

The strategies we outline here stem from a vision of Oregon that we are well positioned to achieve. Here is the essence of that vision:

The Best Would Be Retained

Oregon’s values would be much the same. As summarized in 1986 by the Oregon Futures Commission, Oregonians value sustained and well managed economic development, innovation and creativity, pride in our natural heritage, quality education for all citizens, individual energy and spirit, and strong ethical leadership.

Oregon’s quality of life would be undiminished. Well-located industrial land would be available and competitively priced, especially compared to settings like Seattle and Los Angeles. Power would be plentiful and affordable. Water would be clean and abundant. The work force would be well educated and productive. Our communities would boast excellent, affordable housing, efficient services, good schools, and minimal congestion. Our buildings, bridges, and roads would be well maintained. Our communities, streets, and highways would be uncongested. Both east and west of the Cascades, our natural environment would remain unspoiled.
